http://rredc.nrel.gov/solar/old_data/nsrdb/1961-1990/

Thirty years (1961-1990) of global horizontal, direct normal, and diffuse horizontal solar radiation data from 237 National Weather Stations in the United States plus sites in Guam and Puerto Rico is available at this website. Averages and standard deviations of hourly, daily, monthly, and yearly solar radiation measurements are given. Additionally, temperature, sky cover, precipitable water, and aerosol optical depth are also available. Data is available for each of the individual sites.
