Homework 1

http://docs.lib.noaa.gov/rescue/dwm/data_rescue_daily_weather_maps.html

This NOAA site has archived daily synoptic weather maps of the United States. Daily maps from 1871 to 2002 are available on this web site.

<http://weather.uwyo.edu/>

The University of Wyoming web site has an extensive library of sounding data from around the world, beginning with 1973 to the present. 14 levels of upper air maps from the last three months and synoptic maps from the last month are also available. The upper air maps cover the entire planet while the synoptic maps are only for the United States.
